# *At Last!*

## *Affordable Membership Management Software*

We understand the importance of having a flexible system that remains relevant to you. To this end we have developed a highly customisable system that enables you to tailor data collection to reflect your members.

This cost effective, flexible solution offers features usually found in more expensive membership applications; covering bulk mail-generation, accounts and subscription administration, events and training management including CPE/CPD recording, task management and online member services.

Functionally the MEMNET System can also be customised to meet the demands of individual organisations; with functionality and system size able to be upgraded and grow with you. Select only the modules you need.

### ***With the MEMNET Solution you can have:***

- A fully hosted solution with daily and weekly data backups
- Access to our locally based operations and technical support team
- Upgrades to the MEMNET system as they occur
- Quick and easy implementation
- No upfront or ongoing hardware costs
- No additional software installation
- Secure, easy access to your data online

### ***Benefits of the MEMNET Management solution include:***

- MEMNET is a single, central database containing all your membership details. This means that you do not need to maintain multiple spreadsheets or databases on your members.
- Customised fields means that you can record all information unique to your organisation
- Integrated accounts receivable allows you to centralise your membership processes and streamline membership renewals.
- Integration with word processing and mail merge allows you to maintain your own professional looking templates for member statements, invoices and more.
- Generate targeted e-mail campaigns to connect with your members.
- Extensive user driven and scheduled reporting allows you to produce the reports you need and get the information you want when you need it.
