October 2011

**LATEST NEWS:**

**Latest MEMNET Users**

**We are pleased to welcome our new clients of MEMNET:**

[The Primary Club of Australia](#)

and

[The Petroleum Club of WA](#)

NAQ welcomes its new clients; we look forward to continuing a long and mutually beneficial relationship.

Spotlight for this issue is reporting. Report Master allows you to generate reports at anytime, or any data in the system, all menu driven, no programming expertise needed. You can also schedule reports to run automatically and deliver the output by email; producing and distributing those regular management reports automatically.

**Associations Forum Conference**

The Associations Forum Conference gets bigger and bigger each year and we were pleased to be an exhibitor at the Event at the Brisbane Convention Centre at the end of July.

There was a lot of interest in MEMNET. We showcased the integration of the Membership Management and Events with a fully featured Member self service module at an affordable price. This has assisted many organisations to reconsider the affordability for them to offer state of the art facilities to their Membership. These are not just facilities that can only be afforded by the larger membership organisations.

**MEMNET Version 2.6.1 October Release**

We have continued to enhance the MEMNET product and to provide those enhancements to our licensed clients.

Enhancements of note released in v2.6.1 include:

- **Extended Features in Member Self Service**  
We have continued to build on the Member Self Service features especially related to increasing the features and options available to you as an Organisation to allow members to administer their own account. We have extended the configurable options including:
  - subscription renewals (both invoiced and invites)
  - view the other people associated with your membership
  - event registration to collect variable information against a booking
  - automatic online creation of invoices/receipts as required.
- **Accrual Accounting Report**  
A standard report has been released that will allow easy reconciliation between MEMNET and your accounting system relating to Fees in Advance. For those users that operate Accrual Accounting you will be able to report on all invoices generated within MEMNET and be able to summarise the revenue attributable to a particular accounting period and to report on fees that are yet to be recognised as income.

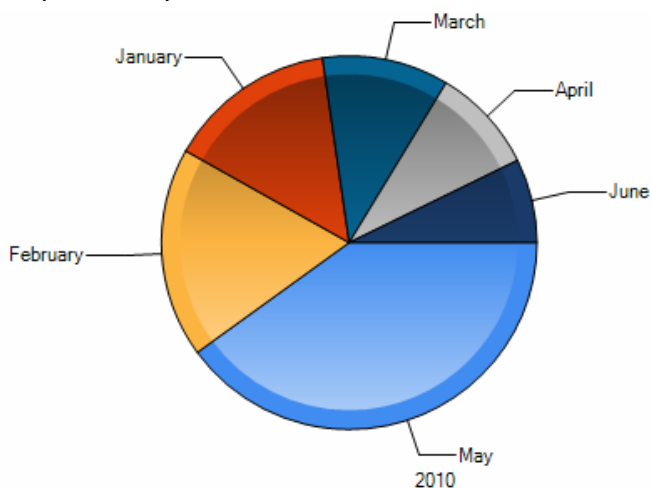

A full video recording of the latest release webinar is available within the MEMNET Help system.

## Spotlight on: Report Master

MEMNET provides numerous CSV extracts and a number of standard reports. However, to have full flexibility for the one-off and regular reporting required by your organisation you can utilise the powerful self service reporting module ReportMaster.

You require no programming skills as the report building process is all menu driven allowing you to produce reports from simple menu selections and review the report at each step online.

Providing extensive reporting capabilities, the MEMNET ReportMaster module provides powerful ad-hoc reporting, reports in numerous tabular and graphical formats, even including Pivot tables and drill down capability. The automatic scheduler and email distribution allows reports to be distributed to not only internal staff but also external recipients of your choice.
